

Full-Wrap Drum Blanket Heater

P# DM-55DWH Series, Quick-Mount Drum Blanket Heaters

For Controlled, Rapid, Uniform High Efficiency Drum Heating

The DRUM-MATES® Drum Wrap Blanket Heaters are designed to provide elevated temperatures with this safe, practical, efficient heater design. It provides your product with protection from cold, correct temperature, preferred viscosity control and better over-all Quality Control. A built-in adjustable thermostat prevents runaway temperature elevation. For non-flammable use only. Not for use in wet conditions.

DM-55DWH Drum Wrap Heater

Drum Heater Models & Specifications

P# **DM-55DWH/M120-1**, 55g metal drum heater, 50-450°F, 120v

P# **DM-55DWH/M240-1**, 55g metal drum heater, 50-450°F, 240v

P# **DM-55DWH/P120-1**, 55g plastic drum heater, 50-450°F, 120v

P# **DM-55DWH/P240-1**, 55g plastic drum heater, 50-450°F, 240v

P# **DM-55DLC**, Drum lid insulator, sits on drum top with bung access ports

Benefits & Features

- Provides Fast, Easy, Uniform Drum Heating with Simple One-Step VELCRO® Installation
- Adjustable EZ-Set Digital Controller, also available for plastic drums at Max. 160°F, 750 Watts
- Both Heats and Insulates – with Low Watt Density with Full Drum, Draft and Wind Resistant Coverage
- 120VAC/1PH - 1440 Watt or 240VAC/1PH - 2880 Watt, 6 ft Power Cord
- Thermostat Variable Temperature Control, 50-450° F (10-232°C)
- Dimensions: Wrap 70" Length, (1778 mm), 33.75" (857 mm) Ht
- For Undercover or Indoor Use Only, No wetted exposure
- Choice of One or Two Separate Heat Zones

Optional: DM-55DBH Base Heater
Reduces Drum Heat-up Time!

Optional Accessories

DM-55DCS, Velcro closure 6" strip expands heater blanket to 24.2" OD

DM-55DBH-120, Series metal & plastic drum base heaters, 120 or 240 volts, Temp. 35-800* F
