

# Bung ThreadReducers™

## 316 Stainless Steel or Polypropylene

### Safer > Easier > Quicker Equipment Mounting

Reduces 2" Bung Openings for Mounting Equipment in Drums, IBC's and Tanks

Mounting equipment into the 2" Npt fine thread or metric coarse thread bung holes of drums, IBC's (totes) tanks, reservoirs, day tanks and other vessels can now be less time consuming and easier. Correct mounting of bung equipment results in more safe, efficient operating conditions, with less down time.

These polypropylene or 316 stainless steel drum bung ThreadReducers™ offer safe, rapid economic mounting of all kinds of industrial, scientific and laboratory equipment. Equipment includes but is not limited to thermometers, level gauges, pressure gauges, filters, funnels, pump pickup tubes, mixers, sampling tubes, and a wide variety of other process and laboratory equipment.
