

Heat That Drum!

Drum Immersion Heater

- Easier mixing or pouring with lower viscosity!
- Fits through 2" or larger bung opening
- Up to 275°F heat-up with auto-cut-off
- Adjustable SS mounting bracket
- Unheated stem prevents low-level damage

Over-the-Side Heater
Type DR - Bung Hole

APPLICATIONS

Suitable for 55 gallon drums where it is desirable to be able to remove the heater for inspection or inserting into another drum. Standard with Incoloy 800 sheath material, heater may be used to heat many different types of fluids.

STANDARD FEATURES

The standard unit includes an industrial thermostat with 50° - 250° F temperature range. The Incoloy 800 sheath material is suitable for most types of fluids .

OPTIONS

A moisture tight enclosure with tamperproof thermostat is a popular option as well as a thermal cutout with a manual reset.
